

Facilities Management and the Business of Managing Assets

The importance of facilities management to the effective operation of all businesses is now widely accepted. Where there continues to be debate is on what constitutes a successful approach, and how much attention it should be given within an overall business plan. Drawing on both research and current practice, this book provides a systematic, innovative, and business-focused approach to the management of facilities assets. The reader will discover why and how to use facility assets to achieve business goals and strategies by aligning them as a resource. Striking a balance between management and technical aspects, the book covers: the basics of facilities asset management and the key elements of a systematic management approach; the key supporting capabilities for facilities management as a business function; a framework for considering strategic alignment of facilities assets and associated services with business needs; the role of life-cycle asset management and its contribution to business resource management. The message of this book and the benefits it can bring to businesses everywhere make it essential reading for executives as well as facilities managers. Its detailed explanations of all of the key concepts involved, and lists of recommended further reading also make it an excellent resource for those new to the industry, and for students of property or facilities management.

Home Home Search Mortgage Information Buyer Information Sellers information Contact Me Green Blog Events Calendar Use our Mapping Search to find listings in a certain area. She has an interest in the environment and passionate about the community and how we are living on this planet. Sitting on the board of "Living Green" and the steering committee of "Transition Barrie", she is well advised about the concerns and problems facing residents. "I believe that I can bring a lot to the table in terms of our experience in the Barrie and surrounding area Real Estate market, our knowledge of the Community and our study of the Environment." An award winning Realtor and "Hall of Fame" award of excellence. "I will only take on the new business that I can handle" "I am not interested in stock piling listings with the hopes that, by the law of

averages, some will sell.â€• Karen is hard working, dedicated and determined to provide the best possible service to her clients and customers. Why use a â€œGreen Realtorâ€• There are already signs that in the near future energy costs will continue to rise. When shopping for a new home, it is imperative that buyers compare homes based on the normal criteria of location, size and functionality along with the homes potential for energy efficiency by concentrating on insulation, type of windows, furnace, roof, age of the structure, type of wiring, type of plumbing, lot grading and the potential to grow your own food should you desire. We can make this process easier for you with our knowledge of the area builders over a long period of time and our training on efficiency and energy efficient products. We can point out periods of rapid growth when homes in our city were not well constructed and were rendered very poor on the scale of energy efficiency. We can point out builders that meet LEED standards or Green standards and have built to the highest levels of efficiency. Quick Search Search Featured Property RE/MAX Chay Realty Inc.
