

Bob Blairs Pipeline: The Business and Politics of Northern Energy Development Projects

Written in the early 80s, this book brings to life the fascinating story of pipeliners, politicians and the chase for the big energy dollars. Francois Bregha discusses the implications of the federal Liberal governments 1980 decision to support the prebuild of a section of the Alaska Highway pipeline project, permitting the export of Alberta gas to American markets at a time when Canada was struggling to conserve non-renewable resources. Bregha traces the steps by which the Liberal government concluded a bad deal, under intense pressure from the Alberta government, Alberta gas producers and the ever-active Bob Blair, whose Foothills company stood to gain huge windfall profits from the project. Bob Blair's Pipeline is a fascinating account of conflict and accommodation between business and several levels of government in the highly-charged field of northern energy development.

She has an interest in the environment and passionate about the community and how we are living on this planet. Sitting on the board of "Living Green" and the steering committee of "Transition Barrie," she is well advised about the concerns and problems facing residents. "I believe that I can bring a lot to the table in terms of our experience in the Barrie and surrounding area Real Estate market, our knowledge of the Community and our study of the Environment." An award winning Realtor and "Hall of Fame" award of excellence. "I will only take on the new business that I can handle" "I am not interested in stock piling listings with the hopes that, by the law of averages, some will sell." Karen is hard working, dedicated and determined to provide the best possible service to her clients and customers. Why use a "Green Realtor"? There are already signs that in the near future energy costs will continue to rise. When shopping for a new home, it is imperative that buyers compare homes based on the normal criteria of location, size and functionality along with the homes potential for energy efficiency by concentrating on insulation, type of windows, furnace, roof, age of the structure, type of wiring, type of plumbing, lot grading and the potential to grow your own food should you desire. We can make this process easier for you with our knowledge of the area builders over a long period of time and our training on efficiency and energy efficient products. We can point out periods of rapid growth when homes in our city were not well constructed and were rendered very poor on the scale of energy efficiency. We can point out builders that meet LEED standards or Green standards and have built to the highest levels of efficiency. Quick Search Search Featured Property RE/MAX Chay Realty Inc.
