

Saving Energy - A Step by Step Guide for Saving Electricity, Gas and Water in Every Room of Your Home

Who doesn't want to save electricity, gas and water in their home? Even folks who do not believe in global warming or climate change would rather not spend more money for energy than they have to. Whether you live in a shack in the middle of the forest in Maine, or in a high rise apartment in New York City, there are many easy things you can do to reduce your energy costs. Fortunately you do not have to live like the Amish or make drastic changes to your life to reduce your energy consumption. You only have to make a conscious effort. Are you sick of yet another high electricity bill? Do you feel like you are powerless against the big utility companies? You are not powerless anymore. Using the methods described in *Saving Energy: A Step by Step Guide for Saving Electricity, Gas and Water in Every Room of Your Home* you will be empowered to reduce your energy usage by up to 50%. Hard-core readers will save even more! The author, Jody Graham, has been helping others reduce their energy costs for over a decade while helping them get off the power grid and power their homes with solar energy. He has also been living off the grid for over twelve years and has had to learn and implement these strategies in order to make his solar home as efficient as possible. All purchasers of this book will also receive three extra bonuses: 1. Access to more energy saving tips, videos and formulas that expand on this book's contents to encourage you to get started on your energy saving journey right away. It is our gift to you. 2. Free updates for life. It is our goal to make the most comprehensive resource on the planet for *Saving Energy in your home*. We will be making updates to this book every 6 months. As our customer, we will send you these updates for free. Go to our website for more details. 3. Ability to earn free books. To make this book the best energy saving book available we are asking our valuable readers for ideas and tips to add to

our book. If you have a great electricity, gas or water saving tip, please go to our website and submit your idea. If we use your submission, we will give you a free copy of one of our other books which also will include free lifetime updates. Simply visit books.jodygraham.com and click on Saving Energy to claim your extra bonuses. See you there!

Use our My Home Hunter feature to be notified when your dream home hits the market. **Barrie's Green Realtor Karen Fox** has been selling real estate for over 23 years in the Barrie area. She has an interest in the environment and passionate about the community and how we are living on this planet. Sitting on the board of "Living Green" and the steering committee of "Transition Barrie", she is well advised about the concerns and problems facing residents. "I believe that I can bring a lot to the table in terms of our experience in the Barrie and surrounding area Real Estate market, our knowledge of the Community and our study of the Environment." An award winning Realtor and "Hall of Fame" award of excellence. "I will only take on the new business that I can handle" "I am not interested in stock piling listings with the hopes that, by the law of averages, some will sell." Karen is hard working, dedicated and determined to provide the best possible service to her clients and customers. Why use a "Green Realtor"? There are already signs that in the near future energy costs will continue to rise. When shopping for a new home, it is imperative that buyers compare homes based on the normal criteria of location, size and functionality along with the homes potential for energy efficiency by concentrating on insulation, type of windows, furnace, roof, age of the structure, type of wiring, type of plumbing, lot grading and the potential to grow your own food should you desire. We can make this process easier for you with our knowledge of the area builders over a long period of time and our training on efficiency and energy efficient products. We can point out periods of rapid growth when homes in our city were not well constructed and were rendered very poor on the scale of energy efficiency. We can point out builders that meet LEED standards or Green standards and have built to the highest levels of efficiency. Quick Search Search Featured Property RE/MAX Chay Realty Inc.
