

Patterns of Supplementary Parenting (Child Nurturance)

The United Nations designation of 1979 as the International Year of the Child marked the first global effort undertaken to heighten awareness of the special needs of children. Activities initiated during this special year were designed to promote purposive and collaborative actions for the benefit of children throughout the world. Michigan State University's celebration of the International Year of the Child was held from September 1979 through June 1980. A variety of activities focused attention on the multiplicity of factors affecting the welfare of today's children as well as the children of the future. Many people involved with the university were concerned that benefits to children continue beyond the official time allocated to the celebration. The series *Child Nurturance* is one response to this concern. The first five volumes of *Child Nurturance* reflect directly the activities held on the Michigan State University campus and consist of original contributions from guest speakers and invited contributors. Subsequent biennial volumes will present original contributions from individuals representing such fields as anthropology, biology, education, human ecology, psychology, philosophy, sociology, and medicine. We hope the material presented in these volumes will promote greater understanding of children and encourage interdisciplinary inquiry into the individual, family, societal and cultural variables which influence their welfare and development. We would like to express both our thanks and our admiration for Margaret Burritt who not only typed the camera-ready copy for each of the volumes, but also served as general manager of the entire project.

Home Home Search Mortgage Information Buyer Information Sellers information Contact Me Green Blog Events Calendar Use our Mapping Search to find listings in a certain area. Then get step by step directions. We want the buying process to be stress free and simple. Try our easy to use Search! Use our My Home Hunter feature to be notified when your dream home hits the market. Barrie's Green Realtor Karen Fox has been selling real estate for over 23 years in

the Barrie area. She has an interest in the environment and passionate about the community and how we are living on this planet. Sitting on the board of "Living Green" and the steering committee of "Transition Barrie", she is well advised about the concerns and problems facing residents. "I believe that I can bring a lot to the table in terms of our experience in the Barrie and surrounding area Real Estate market, our knowledge of the Community and our study of the Environment." An award winning Realtor and "Hall of Fame" award of excellence. "I will only take on the new business that I can handle." "I am not interested in stock piling listings with the hopes that, by the law of averages, some will sell." Karen is hard working, dedicated and determined to provide the best possible service to her clients and customers. Why use a "Green Realtor"? There are already signs that in the near future energy costs will continue to rise. When shopping for a new home, it is imperative that buyers compare homes based on the normal criteria of location, size and functionality along with the homes potential for energy efficiency by concentrating on insulation, type of windows, furnace, roof, age of the structure, type of wiring, type of plumbing, lot grading and the potential to grow your own food should you desire. We can make this process easier for you with our knowledge of the area builders over a long period of time and our training on efficiency and energy efficient products. We can point out periods of rapid growth when homes in our city were not well constructed and were rendered very poor on the scale of energy efficiency. We can point out builders that meet LEED standards or Green standards and have built to the highest levels of efficiency. Quick Search Search Featured Property RE/MAX Chay Realty Inc.
