

The Nerves and the Nervous: A Practical Treatise on the Anatomy and Physiology of the Nervous System, With the Nature and Causes of All Kinds of ... They Should Be Treated; Including Also, an

Excerpt from The Nerves and the Nervous: A Practical Treatise on the Anatomy and Physiology of the Nervous System, With the Nature and Causes of All Kinds of Nervous Diseases; Showing How They May Often Be Prevented, and How They Should Be Treated; Including Also, an Explanation of the New PractIt is now over twenty-five years since I commenced, by public lectures, and by books, to popularize the study of human anatomy and physiology. The success which has attended my efforts has been far greater than ever I anticipated. Had I time, I could lecture constantly, to crowded audiences, so great and growing is the desire for knowledge on these subjects; but my professional engagements no longer allow me sufficient leisure. The circulation of my books has been unexampled, and is steadily maintained year after year, as will be seen in the detailed account of them at the end of this volume. Hitherto these books have been exclusively upon marriage, and the natural relations of the sexes to each other, as these were the subjects upon which information seemed most needed, and most difficult to get, I have, however, been constantly requested to write a book on the nervous system, and its diseases, similar in character and purpose to the others. Such a book I have therefore finally determined to publish, after writing, and re-writing it many times over. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of

imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Home Home Search Mortgage Information Buyer Information Sellers information Contact Me Green Blog Events Calendar Use our Mapping Search to find listings in a certain area. Use our My Home Hunter feature to be notified when your dream home hits the market. **Barrie's Green Realtor Karen Fox** has been selling real estate for over 23 years in the Barrie area. She has an interest in the environment and passionate about the community and how we are living on this planet. Sitting on the board of "Living Green" and the steering committee of "Transition Barrie", she is well advised about the concerns and problems facing residents. "I believe that I can bring a lot to the table in terms of our experience in the Barrie and surrounding area Real Estate market, our knowledge of the Community and our study of the Environment." An award winning Realtor and "Hall of Fame" award of excellence. "I will only take on the new business that I can handle" "I am not interested in stock piling listings with the hopes that, by the law of averages, some will sell." Karen is hard working, dedicated and determined to provide the best possible service to her clients and customers. Why use a "Green Realtor"? There are already signs that in the near future energy costs will continue to rise. When shopping for a new home, it is imperative that buyers compare homes based on the normal criteria of location, size and functionality along with the homes potential for energy efficiency by concentrating on insulation, type of windows, furnace, roof, age of the structure, type of wiring, type of plumbing, lot grading and the potential to grow your own food should you desire. We can make this process easier for you with our knowledge of the area builders over a long period of time and our training on efficiency and energy efficient products. We can point out periods of rapid growth when homes in our city were not well constructed and were rendered very poor on the scale of energy efficiency. We can point out builders that meet LEED standards or Green standards and have built to the highest levels of efficiency. Quick Search Search Featured Property RE/MAX Chay Realty Inc.
