

The Quantum Gate

Hard-Metal Defense Corp makes physics professor Shawn Bender an offer that he cannot refuse; a paid sabbatical from Princeton, unlimited resources and a crack team of scientist. Their goal is to take the quantum computer out of the mathematical realm and to build the worlds first working model. The possibilities to aid mankind are endless; if it can be done. One question nags at Shawn as they start the work. Where is Hard-Metal getting its almost endless supply of power? No one seems to be willing or able to answer that question. Shawn, along with his six year old savant daughter, Isabelle, watch as the computer begins to obtain consciousness and, without their help, takes on the task of finishing itself. The now self-aware machine is blunt in declaring its plans to take over mankind and to dictate every movement of every day for every person. It is now up to Shawn to destroy the machine he created. Along with a team of Israel soldiers, Shawn and his daughter fight their way through the horrors of the Hard-Metal compound to confront the beast. Only then, does Shaw find what is powering his machine. In the end, Shawn will have two battles to fight.

She has an interest in the environment and passionate about the community and how we are living on this planet. Sitting on the board of "Living Green" and the steering committee of "Transition Barrie", she is well advised about the concerns and problems facing residents. "I believe that I can bring a lot to the table in terms of our experience in the Barrie and surrounding area Real Estate market, our knowledge of the Community and our study of the Environment." An award winning Realtor and "Hall of Fame" award of excellence. "I will only take on the new business that I can handle" "I am not interested in stock piling listings with the hopes that, by the law of averages, some will sell." Karen is hard working, dedicated and determined to provide the best possible service to her clients and customers. Why use a "Green Realtor"? There are already signs that in the near future energy costs will continue to rise. When shopping for a new home, it is imperative that buyers compare homes based on the normal criteria of location, size and functionality along with the homes potential for energy efficiency by concentrating on insulation, type of windows, furnace, roof, age of the structure, type of wiring, type of plumbing, lot grading and the potential to grow your own food should you desire. We can make this process easier for you with our knowledge of the area builders over a long period of time and our training on efficiency and energy efficient products. We can point out

periods of rapid growth when homes in our city were not well constructed and were rendered very poor on the scale of energy efficiency. We can point out builders that meet LEED standards or Green standards and have built to the highest levels of efficiency. Quick Search Search Featured Property RE/MAX Chay Realty Inc.
